

EPA Facility Registry Service – Toxic Substances Control Act (TSCA)

EPA Geospatial
U.S. EPA

View Map | Download | More

Summary

EPA's Facility Registry Service (FRS) subset of facilities that link to the Toxic Substances Control Act (TSCA) Chemical Substance Inventory in the United States and territories and tribal areas. Data are updated weekly.

Overview

This web feature service contains location and facility identification information from EPA's Facility Registry Service (FRS) for the subset of facilities that link to the Toxic Substances Control Act (TSCA) Chemical Substance Inventory System. Section 8 (b) of the Toxic Substances Control Act (TSCA) requires EPA to compile, keep current and publish a list

Relevant Area

The identification number assigned by the EPA Facility Registry System to uniquely identify a facility site.

Facility Site Name
The public or commercial name of a facility site (i.e., the full name that commonly appears on invoices, signs, or other business documents, or as assigned by the state when the name is ambiguous).

Location Address
The address that describes the physical (geographic) location of the front door or main entrance of a facility site, including urban-style street address or rural address.

City Name
The name of the city, town, village or other locality, when identifiable, within whose boundaries (the majority of) the facility site is located. This is not always the same as the city used for USPS mail delivery.

County Name
The name of the U.S. county or county equivalent in which the facility site is physically located.

County and State FIPS Code
The Federal Information Processing Standard (FIPS) code identifying the county or county equivalent and the state or state equivalent of the United States where the facility is located.

State USPS Code
The U.S. Postal Service abbreviation that represents the state or state equivalent for the U.S. and Canada.

Location Zip Code
The combination of the five digit Zone Improvement Plan (ZIP) code and the four digit extension code (if available) that represents the geographic segment that is a subunit of the ZIP Code, assigned by the U.S. Postal Service to a geographic location; or the postal zone specific to the country, other than the U.S., where the facility site is located.
